

Certified in FAMI-QS and ISO14001, Animine is specialized in value added sources of trace minerals for animal nutrition. To support our R&D activities for the fast-growing international business we are seeking you:

Junior R&D Manager

- ✓ MSc or PhD degree in animal nutrition
- ✓ First experience in the compound feed or feed specialties industry
- ✓ Basic knowledge in the nutrition of monogastrics and ruminants
- ✓ Supervision of scientific experiments
- ✓ Possess a 'can do' attitude, self-organization, and respect of deadlines
- ✓ Sense of responsibility in a lean organization
- ✓ Proficient in spoken and written English

The incumbent will be in charge of an experimental program on farm animals, which is conducted in collaboration with European scientific partners.

R&D Director

- ✓ PhD degree with professional experience in animal sciences, preferably in feed additives
- ✓ Solid knowledge in nutrition of monogastrics and ruminants
- ✓ Good communicator with strong skills in writing
- ✓ Proven ability to manage projects, priorities, and people
- ✓ Stress resilient
- ✓ Creative and innovative attitude
- ✓ Excellent command in spoken and written English
- ✓ Willingness to frequent international travelling

Driving the strategic and operational vision of our R&D; leading a scientific team and supervising experimental programs on our products; servicing internal and external clients.

Both jobs are based in Annecy - Haute-Savoie, French Alps. Please send your application in English to our HR Business Partner:
